

The new Ontology San Francisco office is looking for talent!

Position: Technology Evangelist/Developer Advocate

Location: San Francisco, CA

This is an amazing opportunity for those who want to be a team leader and a key member of Ontology's business in the USA from day one.

As a Technology Evangelist/Developer Advocate, your primary responsibility will be representing Ontology towards the community and from the community towards the core team developers. You will be working closely with our development team and creating educational material to help a new generation of developers start building on Ontology. You will help community members to organize developer-oriented events, meetups, workshops, hackathons, as well as organize and speak at similar events organized by the Ontology team.

Successful candidates must have the passion to grow with Ontology. It is an exciting time to join a startup environment of a top global blockchain project!

Job responsibilities:

- Content creation and distribution and analytics – tutorials, developer guides, newsletters, sample apps, client libraries;
- Communicate with dApp developers regularly online and offline;
- Represent Ontology in conferences and be good at public speaking;
- Creating and implementing detailed annual, monthly, and weekly plans for advocacy/engagement activities;
- Organize and coordinate workshops and marketing engagement activities, including social media campaigns, YouTube broadcasts, progress reports, and engage with and provide support to community meetup organizers;
- Content sourcing from third parties, distribution, and analytics;
- Identify content and process improvements through analytics and feedback loop;

- Experience in SEO-aware content design and creation;
- Communicate with the rest of the team about what you learned from talking with developers, in order to inform product, business, and technical decisions.

Job requirements:

- Experience writing tutorials, guides, API docs, sample apps;
- Experience in dApp development, familiarity with popular dApp tools such as Golang/Solidity/Truffle/MetaMask;
- Strong technical understanding/background of blockchain;
- Those with work experience in IT industry customer support role are preferred;
- Native English speaker is a must and must be already based in California.
